Lows

# Weather Forecast

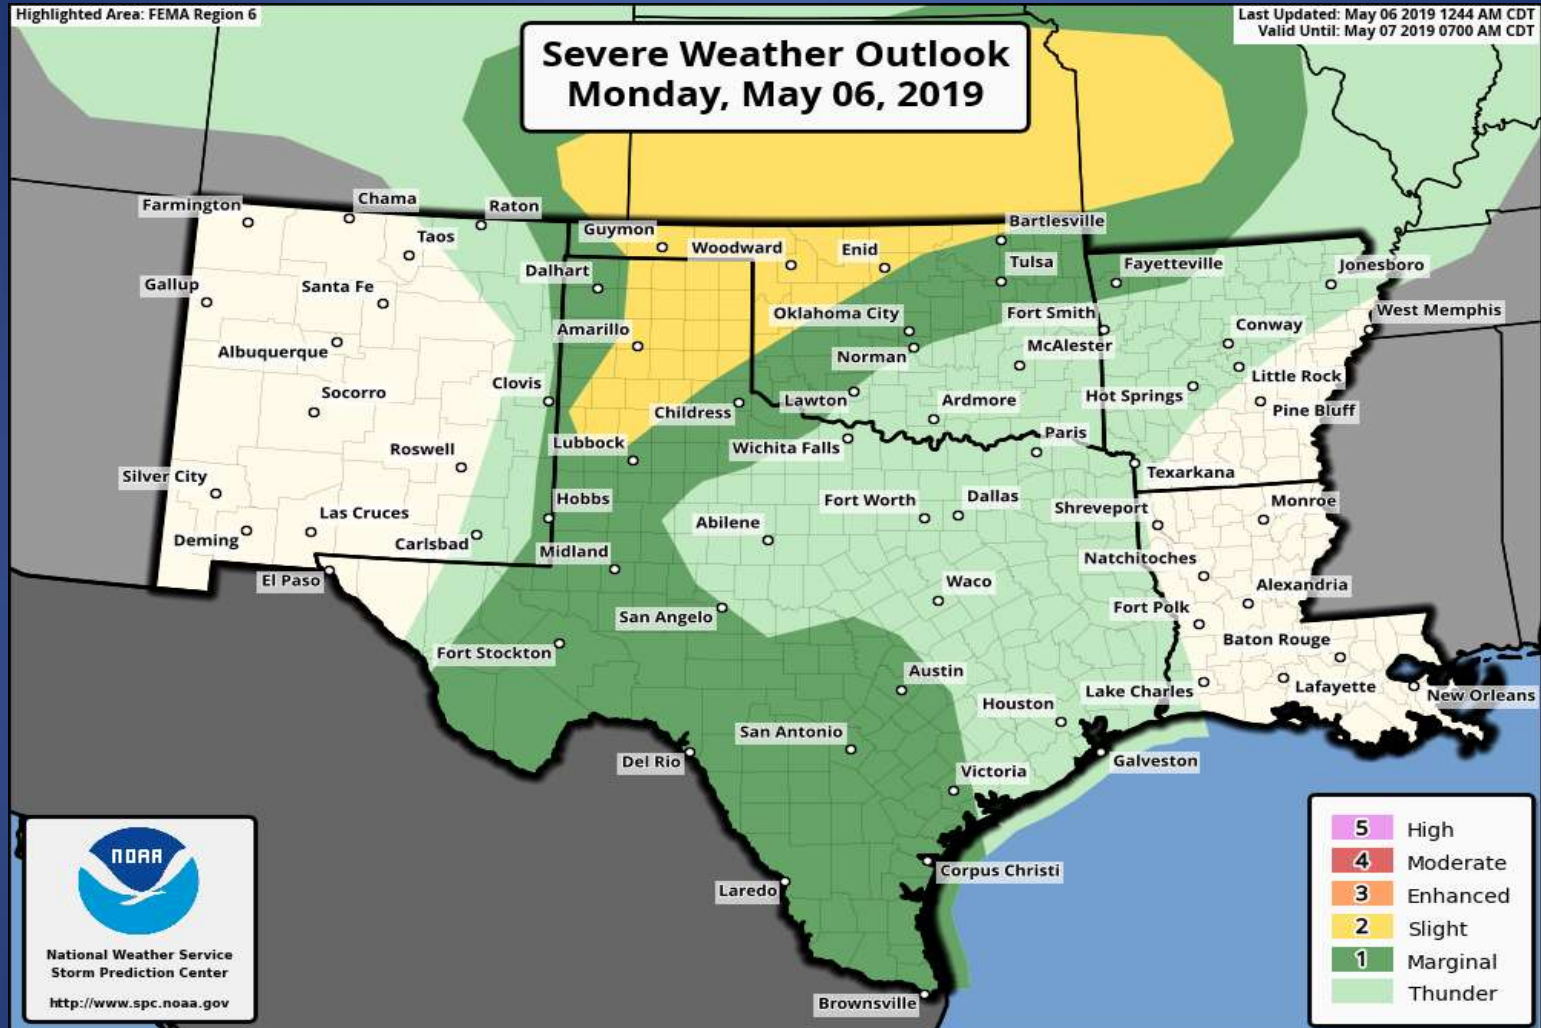

## Wind Speeds

## Gusts

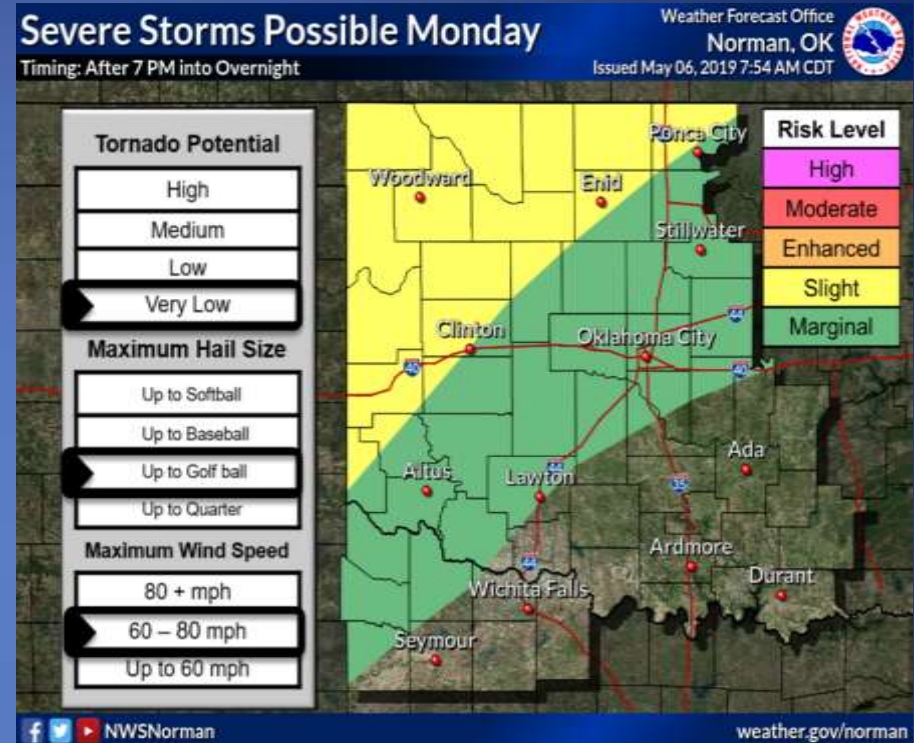

# Hazardous Weather

# Hazardous Weather

Isolated severe storms are once again expected this afternoon and evening across all but the far western Panhandles. The main risk with these storms will be very large hail, followed by lightning and damaging winds. Additionally, an isolated tornado cannot be ruled out, with a relatively higher risk across the eastern two thirds of the Oklahoma Panhandle and far northeastern Texas Panhandle.

There is a slight risk for severe storms across northern and western Oklahoma on Monday, with a marginal risk extending into central Oklahoma and western north Texas. Most likely timing will be late afternoon into the overnight hours. Main hazards will be strong winds 60 to 70 mph and hail up to the size of golf balls.

# Hazardous Weather

## Most Likely Time for Severe Storms Today

Weather Forecast Office  
Norman, OK  
Issued May 06, 2019 5:45 AM CDT

Most likely time for  
severe storms

7 PM to 1 AM

11 PM to 4 AM

f t NWSNorman

weather.gov/norman

Storms are expected to enter western Oklahoma late this evening after 7pm, moving into western north Texas and central Oklahoma overnight. Most of the storms should be out of the area by 4am.

## Flash Flood Potential Monday

Timing: Late Afternoon into Overnight

Weather Forecast Office  
Norman, OK  
Issued May 06, 2019 3:53 AM CDT

Flash Flood  
Risk

High

Moderate

Slight

Marginal

f t NWSNorman

weather.gov/norman

There is a marginal risk for flash flooding across much of Oklahoma and western north Texas with a slight risk across far northern Oklahoma, mainly for the late afternoon into the overnight period.

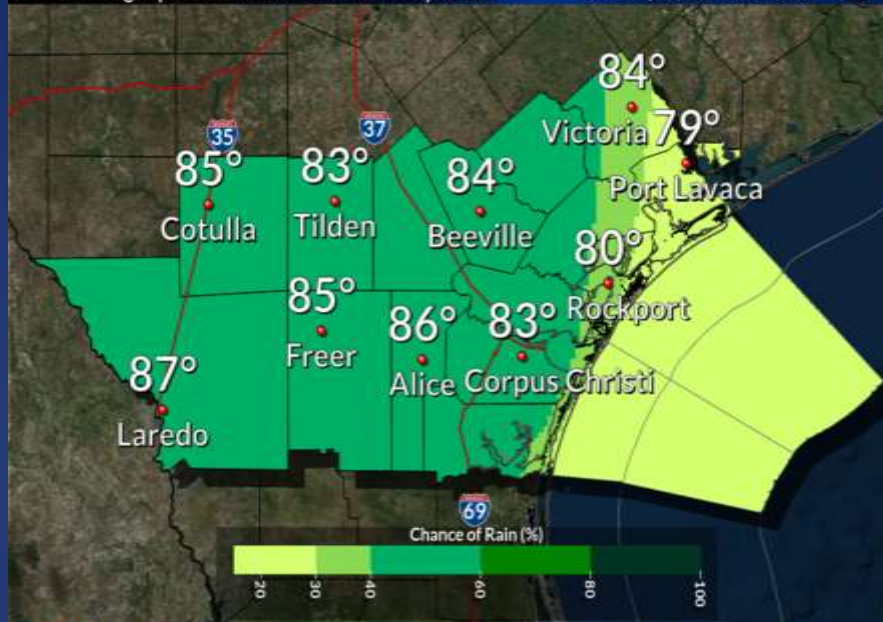

# Hazardous Weather

## Showers/Storms Today

Isolated strong to possible severe storms with heavy rainfall

Weather Forecast Office  
Corpus Christi, TX  
Issued May 06, 2019 6:46 AM CDT

Showers and thunderstorms are expected today, with greatest chances across the Brush Country and inland Coastal Plains. A few of the storms may become strong to possibly severe with hail and gusty winds. Heavy rain with localized flooding is also possible. Highs will range in the 80s.

## Sct'd Showers/T-storms Possible Today

Highs in the Mid-Upper 80s | Moderate SE Winds

Weather Forecast Office  
Brownsville/RGV, TX  
Issued May 06, 2019 5:03 AM CDT

A difficult and relatively low confidence forecast today across Deep South Texas. Scattered showers and thunderstorms are possible (30-40%), especially this afternoon and evening, across the region. Any thunderstorm that forms may potentially produce large hail and damaging winds. Otherwise, mostly cloudy skies expected with highs in the mid-upper 80s. Mariners can expect generally favorable conditions on the coastal waters, with isolated showers and thunderstorms possible.

# Hazardous Weather

## Severe Storms Continue

Above-normal temperatures continue, as well!...

Weather Forecast Office  
Midland/Odessa, TX  
Issued May 6, 2019 3:12 AM CT

### Today

### Tonight

f t NWSMidland

weather.gov/maf

Thunderstorms are possible again today and tonight. Any storms that do develop will be accompanied by frequent lightning, small hail, brief, gusty winds, and locally heavy rainfall. There is a marginal risk of severe storms capable of producing large hail and damaging winds. An isolated tornado or two cannot be ruled out. Otherwise, above-normal temperatures continue!

## Severe Weather Outlook

Severe Weather Chances for: Later Today

Weather Forecast Office  
Lubbock, TX  
Issued May 06, 2019 1:06 AM CDT

f t NWSLubbock

weather.gov/lub

Hail up to 2 inches in diameter and severe wind gusts to 65 mph are possible with any storms that develop later today. Make sure you have multiple ways to receive weather alerts.
